Hello

During my 8 years in the Alaska Legislature, I often had to choose between capital projects. Some are very very poor investments. I urge you to stop pursuing the Juneau Road Project.

It cannot be economically maintained. It is not wanted. There are other vital projects that need doing. If you cannot repair roads, at least rebuild the broken ones first.

Your plans to build the bridges and road to nowhere while you cancel other projects that would repair existing roads and replace aging Alaska Marine Highway vessels is not in the public interest.

These choices put the state at great risk when the Stevens days are past. We will not be forgotten in Washington DC for our waste and poor judgment.

Do not pursue the Juneau Road.

Thank you.
